Claim Rejections - 35 USC § 103

1. Claims 32-34,38-40,42,43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cansell in view of Wittkamp et al.

See previous office action.

Allowable Subject Matter

2. Claims 35,36,37,41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. Claims 44-51 are allowed.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Applicant's remarks have been considered, however the above rejections are still deemed to be proper. Cansell clearly teaches using at least three electrodes (5,6,10); electrode 10 can also be considered the case of the defibrillator (col. 7, line 45+). Further, Cansell shows the ability to have each of them connected to the pulse generator since they all can be used as stimulating electrodes. Also, as required by claim 32 for example, a shock pulse of Cansell can be delivered between electrodes 5 and 6, which can be considered first and second electrodes.
